I. Charging Instructions

- As shown in the diagram below, insert the provided adapters into the DC power input socket and power outlet of the charger bag respectively.

- Turn off the transmitter and receiver, then place them into the charging slots according to the directions shown in the diagram. The battery level indicator will light up.

- Battery Level Indicator Status

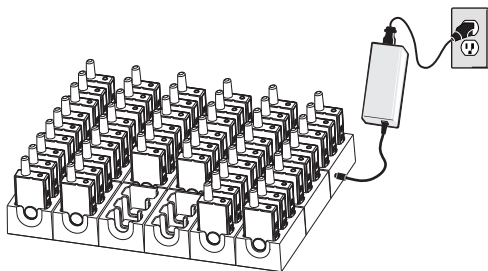

Charging in progress (Full charge takes approximately 6 hours)		
	Green solid light	100%
	Green light flashing	> 60%
	Red solid light	0 - 60%

! The transformer may generate heat during use. Please ensure that the transformer is not covered or obstructed by any objects.

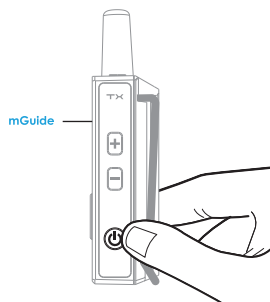

II. Group Pairing Using the Transmitter in the charger bag

Step 1: Place the tour guide receivers in the charger

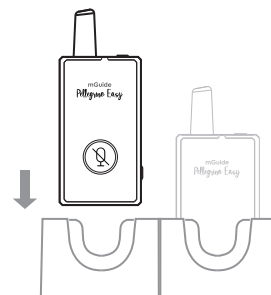

If *mGuide* does not light up or flash, pairing failed.
Make sure the receiver is fully inserted into the charging slot and repeat these steps again.

Step 2: Press the power button  to turn on the transmitter, the *mGuide* will light up.

Step 3: Insert the transmitter into any empty charging slot while it's powered on.

Step 4: During group pairing, the battery level indicators and *mGuide* on all devices will begin flashing alternately (quick red-green flashing alternately 5 times).

Step 5: **Receiver:** Once pairing is complete, the *mGuide* on the receiver will turn off, power indicator light will remain steady, indicating it's in charging mode.

Transmitter: The *mGuide* will remain on for 5 minutes, then power off and enter charging mode.
